

Write Mathematical Expressions for Verbal Expressions

The Language of Algebra

Vocabulary A-Z

Let us learn some vocabulary

variables

are symbols used to represent unspecified numbers or values.

In the algebraic expression $4s$, the letter s is called a variable.

algebraic expression

consists of one or more numbers and variables along with one or more arithmetic operations.

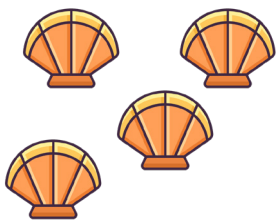

$5x$	$3x - 7$
$m \times 5n$	$3ab \div 5cd$

factors

In each expression, the quantities being multiplied are called factors.

product

In each expression, the result of the multiplied factors is called the product.

3×1	$= 3$
	
The factors are 3 and 1 .	The product is 3

exponent

in the expression x^n the variable n is called the exponent.

base

in the expression x^n the variable x is called the base.

power

The amount an expression like x^n is raised is called a power.

Base	8^2	Exponent (or index, or power)
------	-------	-------------------------------

Remember to read your instructions!

Write an expression
Your answer will be
an **expression**

Example

$14 + 1$
 $26 \div 2$

Evaluate an expression
Your answer will be a
value

Example

15
13

Sometimes it will ask you to write and then evaluate so you must do both!

Let's Begin

Write Algebraic Expression

Write an algebraic expression for 5 less than a number c .

The words less than suggest subtraction.

ANSWER

Thus, the algebraic expression is $c - 5$.

Write an algebraic expression for 9 plus the product of 2 and the number d .

Plus implies add, and product implies multiply.

ANSWER

the expression can be written as $9 + 2d$.

Write an algebraic expression for two thirds of the original volume v .

The word of implies multiply.

ANSWER

The expression can be written as $\frac{2}{3}v$.

Write an algebraic expression for the product of $\frac{3}{4}$ and a to the seventh power.

The word product implies multiplication.

ANSWER

The expression can be written as $\frac{3}{4}a^7$.

Your Turn!

Write Algebraic Expression

Write an algebraic expression for nine more than a number h .

- A. $9 - h$
- B. $9h$
- C. $9 + h$
- D. $h - 9$

Write an algebraic expression for the difference of 6 and 4 times a number x .

- A. $6 - 4x$
- B. $(6 - 4)x$
- C. $6 + 4x$
- D. $6x - 4$

Write an algebraic expression for one half the size of the original perimeter p .

- A. $2p$
- B. $\frac{1}{2}p$
- C. p^2
- D. $p^{1/2}$

Write an algebraic expression for the product of 6 and x to the fifth power.

- A. $6x^5$
- B. $30x$
- C. $6(5x)$
- D. $5x^6$
